

# Home Requirements Mammal Study

*Req. 3 From study and reading, write a simple life history of one nongame mammal that lives in your area. Tell how this mammal lived before its habitat was affected in any way by humans. Tell how it reproduces, what it eats, and its natural habitat. Describe its dependency upon plants and other animals (including humans), and how they depend upon it. Tell how it is helpful or harmful to humankind.*

Scouts will need to do the research for the life history on their own. During class we will discuss what each scout found in their research.

*Req. 5 Working with your counselor, select and carry out one project that will influence the numbers of one or more mammals.*

We will work in class to brainstorm some projects that the Scouts will be able to carry out during their out-of-class time. Once completed, we will discuss their projects and what they learned in class.
