TICK & CHIGGER SAFETY

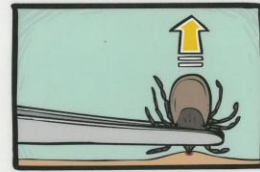

BITE PREVENTION

IDENTIFY

- ▶ Florida has five species common to humans.
- ▶ Ticks are parasites, which suck blood and can transmit disease.

REMOVE

- ▶ Grasp, without crushing, as close to the skin as possible with tweezers.
- ▶ Pull with steady force, perpendicular to the skin.

"CHIGGERS" are another pesky camp pest. Use similar prevention steps to keep from getting nibbled on by these tiny bugs!
