507-327-5149 or [csandquist.law@gmail.com](mailto:csandquist.law@gmail.com)*

This spring, come to camp-o-ree to view Camp Norseland through an environmental lens. Scouts will participate in three separate learning sections about the environmental issues including: invasive species, water quality, and erosion. Each section will have hands on learning and service project work including trail maintenance, water quality measurements and invasive species mitigation. Each section will be led by environmental professionals from local government agencies who work daily to conserve and restore our Minnesota environment.
