Welcome to Spring Camporee

Welcome to the Boone Trails' Spring Camporee, "Building to the Future". The event will include many elements of the 2026 Klondike event that was canceled in January due to the weather. This event will be held on April 17-19 at Camp Warren Levis. We will have a lot of activities for Scouts BSA, Venturers and Webelos to have fun while providing advancement opportunities.

When arriving at camp, participants are asked to stop at the checkpoint to receive updated information from staff. Please be courteous and ask your troop leaders and guests to park in the designated parking areas and follow the traffic guidelines as outlined in this manual.

Upon arrival, please send your Scoutmaster and SPL to Headquarters (HQ) at Winter Lodge. Check-in will begin at 5:30 PM and end at 8:45 pm Friday night. Each unit should bring along a copy of the event registration list. **Turn in completed Range and Target Sports Permission Form for each Scout participating in these activities. Late check in can be completed after the leader meeting** at Swaim Lodge.

There will be an **opening leaders' meeting on Friday night at 9 pm in Swaim Lodge**. During this meeting, staff will provide updates regarding all changes to this manual including plans for possible weather during the event. We will also review camp safety and emergency procedures including both weather and medical emergencies. Please be sure to send your Scoutmaster and SPL to the opening meeting for these important updates. At checkout please send your Scoutmaster and SPL to HQ at Winter Lodge when your campsite is clean including all gear stowed away and campsite inspected for trash. Staff will inspect your campsite and then release your troop and event package (blue cards, event patches, etc.) when completed. Remember to check the Lost and Found at HQ before departing Sunday morning.

Our Camporee is youth-led. During the event, please listen to and follow the directions provided by the youth staff. If you have any questions or comments, please don't hesitate to contact staff or visit HQ. We are here to make sure that your Scouts have a great time and they look forward to our next District event, Fall Camporee, October 2-4 at Beaumont Scout Reservation. We welcome and appreciate your feedback along with suggestions for the future.

Sled Requirements

The sleds will be a part of the Klondike Derby. Sign up for time slots (1:30-4:00 pm) to compete on Saturday at the Friday night leaders' meeting. The sleds MUST meet the following requirements for the **Klondike Derby Race**:

- Must be a life-size sled, which means that a scout should be able to sit comfortably on the sled. Otherwise, sleds can have any dimensions.
- There must be **NO WHEELS** on the sled but it must be able to operate on various surfaces, including snow, grass, and gravel.
- Must be able to hold materials and anything we give you at the event.
- You can use wood, lumber and similar traditional materials for construction, metal may not be used in the frame of the sled.
- Lashings must be the primary fastener on the sled. Screws and nails may be used, however they must be covered by lashings.
- Maximum team size is three for two pulling and one pushing.
- Must be safe and well built (as determined by Staff).

Failure to meet any of the requirements listed above will result in an automatic disqualification from the race. If you have any questions, comments, or concerns on whether or not your sled will qualify for the race, please email the Campmaster for a ruling prior to the event.

Please bring your sled to the Pioneer Pavilion for a pre-race inspection at 1:30 pm.

A sample sled guide to get you started is provided on the next page.

Klondike Derby Sled Plans

The following plan is for a sled that has minimum and maximum dimensions as shown. There is no absolute requirement for these dimensions, but these are typical of those used in most areas.

The sled below is shown as a guide. Your own design may be used if it conforms to the minimum and maximum dimensions. Make sure the sled is strong enough to bear the weight of your equipment and will hold together for a long trip. It is best to use screws rather than nails. Drill first to avoid splitting wood. Varnish bottom of runners and wax before using. Wire netting or a canvas snow curtain may be added to prevent items from falling off of the sled.

Secure a towing rope at the front and secure a brake rope at the rear.

Sled Design:

Materials:

Item	Label	Quantity	Dimensions
Runners	A	2	1" x 4" x 6'2"
Uprights	B1	2	1" x 4" x 3'6"
	B2	2	1" x 4" x 2'8"

	B4	2	1" x 4" x 10"
Upright Supports	C	8	2" x 4" x 4"
