

Dear CPR or Wilderness First Aid Participant,

Please note the additional course COVID measures we will be taking below.

For both classes:

- Level 2 masks and gloves are mandatory for all participants and instructors, no exceptions. Bandanas and cloth coverings are not acceptable.
- We will provide masks and gloves.
- You will be emailed a link to a COVID questionnaire 24 hours prior to the class. You must complete it.
- Your temperature will be taken when you arrive.
- If your temperature is too high or you show signs of illness or your questionnaire answers indicate you cannot take the class, you will be asked to leave.

For CPR:

- Each person will have their own manikin.
- You will be spaced around the room with your manikin. You will remain with your manikin for the duration of the class.
- No chairs will be provided. You may bring your own or sit on the floor.
- For one of the skills practice activities, you will touch another person. If you cannot do that, please don't sign up because you won't pass.

For Wilderness First Aid:

- Saturday class is an online Zoom session for all the lectures.
- Students must participate in both days to pass.
- Sunday will be the in-person skills and scenarios.
- Students will be required to touch one another and be touched in order to demonstrate skills and perform scenarios. Social distancing will not be possible. If you cannot do that, please don't sign up because you won't pass.

Thank you for your cooperation.
