

### Campership Registration

When you make an event registration for a Scout that has applied for a Campership you will see the following check box at the bottom of the youth participant registration screen:

Campership General **Application Required**

Are you applying for "Campership General"?

If the youth registrant has applied for a Campership, please: (1) put a check in the box that precedes "Are you applying for a "Campership"?", and (2) in the "Amount Requested" box, enter the amount of the Campership that was applied for. The applied-for amount of a Campership cannot exceed 50% of the camp fee and it will default to 50% if you type an amount over that.

Campership General **Application Required**

Are you applying for "Campership General"?

Amount Requested

If the youth registrant has NOT applied for a Campership, an application must be submitted before it can be checked on the event registration.

Application Required ✕

This requires an application be submitted before requesting an amount. If you have already submitted an application, be sure your name and unit information are exactly the same as it is on your application.

You can submit an application by registering at <https://247scouting.com/forms/form.php?OrgKey=BSA492&id=3719>.

If this information was not completed when the youth participant was initially registered, the unit's registration contact can go back into the unit's registration and can edit a participant by updating information or using autofill from the unit's roster.

The name of the youth and the unit number must match exactly what is on the application and on the event registration for it to be linked.
