

NEWS FLASH UPDATE!!!!!!.....February 18, 2026

Grand Columbia Territory Polar Bear Camporee

February 27-March 1, 2026

Scout-a-Vista

Elevation 3,373'

NEWS FLASH UPDATE!!!!!!

What if there isn't enough SNOW?

- ❖ A debris shelter utilizing a tarp is allowed and encouraged! However, as I type this there is about 4 inches of new snow with more coming!
- ❖ If we are lacking snow, we will do some map and digital compass/GPS unit work. Regular compasses will not work because of the overhead powerlines!

Yak Track Advisory– New Snow or Not I highly encourage everyone to have YAK tracks or other spiked traction devices on their shoes BEFORE exiting the vehicle! The parking and main walking areas were covered in slick ice when I was up there February 7th.

New Snow works best for shelter building, so LET IT SNOW!!

Excited to see and meet everyone!!
