

HOW WE'LL HAVE A SAFE SUMMER CAMP IN 2021!

PRE-CAMP PREPARATION

Participants are encouraged to limit exposure/contacts and monitor health/symptoms for ten days prior to arrival at camp

PRE-SCREENING

All participants will be required to pre-screen for COVID symptoms/exposure prior to departure for camp

DAILY HEALTH SCREENING:

Participants will be screened upon arrival at camp, and daily health screenings by unit leader/parent will be required for all participants

HANDWASHING & SANITIZING

Increased focus/reminders and availability of handwashing and/or hand sanitizing around camp

OUTDOORS

Being outdoors when at all possible is a priority. This includes modifying programs limiting indoor space usage for groups.

MASKS

All participants are encouraged to wear face mask if it makes them feel more comfortable. Be kind and respectful to others no matter what they choose.

MODIFIED PROGRAMS

Some camp programs, activities, and schedules will be adjusted to limit large gatherings and close contact

FOOD SERVICE

Unlike many other camps as a Patrol / Troop cooking camp meals are prepared in your campsite. Food pick-up could be adjusted to keep large groups from gathering.

SMALL GROUP CLASSES

Troops are encouraged to group their Scouts to attend classes together as much as possible. Currently class sizes have been reduced for this summer but could be increased as we continue to monitor updates to COVID protocols and precautions.
