

March 11, 2020

Dear Scouting Family,

As always, your safety and the safety of all our members, volunteers, and employees is our top priority. We know there are questions and concerns about how COVID-19, commonly known as the coronavirus, could affect local Scouting programs in Inland Northwest Council. Please know that we are monitoring developments regarding COVID-19 both locally and through the [Centers for Disease Control and Prevention \(CDC\)](#).

Additionally, Governor Jay Inslee of Washington, where 24 coronavirus patients have died, ordered a ban in the Seattle area on parades, concerts, festivals and other gatherings bringing together 250 or more people. The ban only applies to King, Pierce and Snohomish counties and is in effect until midnight, March 31, 2020, unless extended. “It is clear that our state needs a more vigorous and more comprehensive and more aggressive position if we are to slow the spread of this epidemic,” Governor Inslee said, adding that the ban could be extended past March. Seattle officials followed with a decision to close the city’s public schools for two weeks, starting tomorrow.

The following information regarding events and prevention measures is based on the latest available guidance. As this is an evolving situation, this information is subject to change. We will continue to update you on relevant developments, and we appreciate your understanding of any necessary adjustments in the interest of health and safety.

Status of Council Events

Currently, no council or district events or activities have been cancelled due to COVID-19. Decisions for future district and council events and camps beyond March 2020 will be made as more information or proclamations are made, but as of now it will be Scouting as Usual. Decisions about unit meetings and activities should be made by unit leadership and chartering organizations based on the unit’s individual circumstances and current CDC and local health department guidelines.

BSA Policies to Prevent the Spread of Illness

The Boy Scouts of America continues to have policies and procedures in place that help protect participants from contracting an illness at large Scouting events. These include the [Annual Health and Medical Record](#) and the [Pre-Event Medical Screening Checklist](#).

Everyday Preventive Measures

Even with those important policies in place, it is critical that we all take these everyday preventive actions to help prevent the spread of respiratory diseases:

- **Stay home when you feel sick.**
- Avoid close contact with people who are sick.

- Avoid touching your eyes, nose, and mouth, and wash your hands before and after doing so.
- **Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you don't have a tissue, cough or sneeze into your upper sleeve/elbow, not your hands.**
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.
- Do not share personal items such as cups, water bottles, eating utensils, etc.
- Avoid shaking hands.
- **Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.** If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.

If you have a fever, cough, or other symptoms associated with COVID-19, or if you believe you may have been exposed to COVID-19, you should isolate and not attend any Scouting events. People who think they may have been exposed to COVID-19 should contact their healthcare provider immediately.

Should you have any questions or concerns about a specific upcoming event or activity, please reach out to your local district executive. We will do everything we can to answer your question using the information available to us.

Yours in Scouting,

Karen Meier
Scout Executive
