

Once you register for the Pinewood Derby building time please watch your email as we will be sending you an email asking you to choose between design (A) and design (B).

In both cases there will be 3 to 4 holes cut through the bodies allowing weight to be added to the cars which we will have on hand as well.

Design (A) is a basic flat cut narrow and design (B) is a more aggressive wedge style cut. In both cases there will be predrilled holes for adding weight which we will have available and there will be sandpaper and so forth there to do some customizing of the block as well. We also be supplying glow-in-the-dark paint so you're prepared for the upcoming district glow-in-the-dark Pinewood Derby.

If you do not respond to our email with the choice we will be making the choice for you so please be sure to emails back right away with your choice.

Design (A)

Design (B)
